

LAMINATED BREEDING EQUIPMENT SYSTEM FOR LAYER

层叠式蛋鸡笼养设备

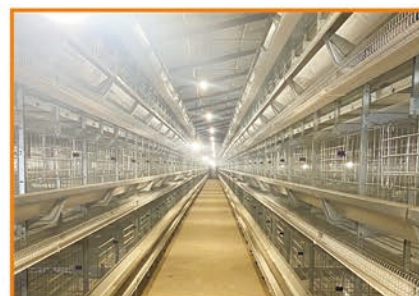

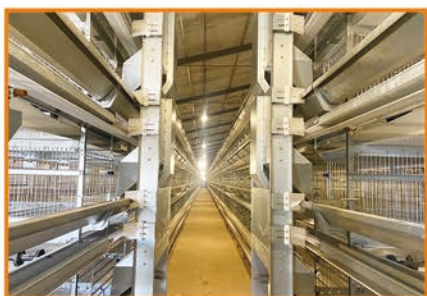

- 层叠式蛋鸡笼养设备笼门设计为半开或者全开式，方便管理。
- 设备侧网用钢丝进行连接，增强了空气对流，保证了鸡笼内通风，从而降低鸡只本身的温度。
- 该设备方便清洁，保证鸡只卫生舒适的生活环境。
- 设备配有全套全自动化横向中央集蛋系统。
- 为配合层叠设备的使用寿命，笼具全部自主采用热浸锌处理或镀铝锌丝。
- 整个框架是用镀锌板制作而成，设计合理，经久耐用，不易变形，更加牢固。
- 运用高精尖技术数控机床进行定位切割。

- The portal of layer cage is semi-open or fully-open designed for easy management.
- The side cage mesh is connected with steel wire which can strengthen the air convection to ensure the ventilation of the house and reduce the temperature of chicken.
- The equipment is easy to clean, which can offer a comfortable living environment for chicken.
- With full-automatic egg collection system.
- Hot-dip galvanized or Al-zinc coating cage mesh make sure the long service life of the equipment.
- Main frame structure of the equipment with reasonable design, durability, no deformation, stability is made of hot-dip galvanized steel plate
- High precision numerical control machine is utilized for positioning cutting.

⊕ 层叠式蛋鸡笼养成套设备，是当前同类笼养机械设备中科技含量、自动化程度最高的养鸡设备，代表了蛋鸡规模化、集约化养殖设备的发展方向。

⊕ Multi-tier complete set of layer raising equipment is the highest degree of automation and scientific、 technological content comparing with other current cage poultry raising equipment. It represents the development direction of large-scale and intensive breeding for poultry farming equipment.

⊕ 集约化管理和自动化控制，实现自动喂料、饮水、清粪、捡蛋，提高劳动生产率，节约人工成本。

⊕ 可实现最高12层的高密度养殖，节约土地，减少建设投资和管理费用。

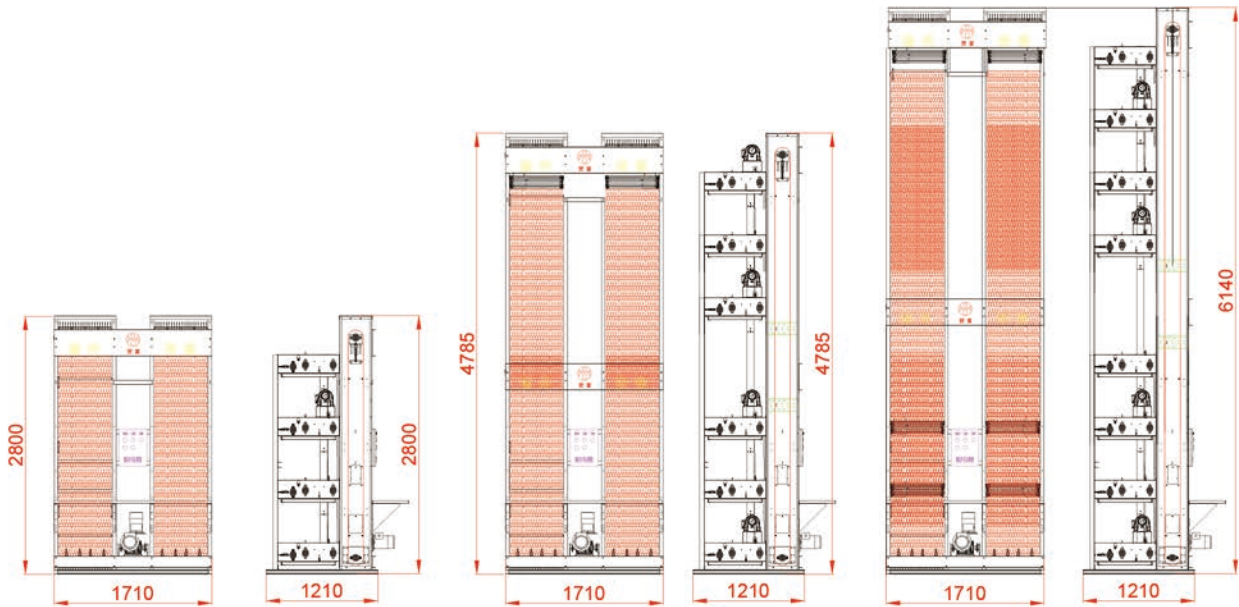

⊕ 适用于密封式鸡舍，自动化控制通风和温度，确保鸡舍内环境满足鸡只需求。

⊕ Intensive management and fully automatic control system realize feeding、 drinking、 manure cleaning、 environmental control and egg collecting automatically which improve the rate of labor productivity and save the labor cost.

⊕ High-density breeding of up to 12 tiers can be realized the aim to reduce construction investment and management costs.

⊕ It is suitable for enclosed chicken house. Using automatic controlling system for ventilation and temperature make sure the good environment of breeding chicken in the house.
