

LAMINATED MIXED BREEDING EQUIPMENT SYSTEM FOR COCKS AND HENS

层叠式公母混养设备

- ⊗ 笼内部分底网做加密处理，使鸡只站在上面时比较平稳、舒适，能有效提高母鸡自然受精成功率。
- ⊗ 笼内设计两条栖息杠，可供鸡只站在上面休息。
- ⊗ 公鸡和母鸡使用不同的饮水系统。
- ⊗ 供料系统可满足公鸡和母鸡不同的采食需求。
- ⊗ 在头尾空位处，增加回料器的同时，为了防止造成饲料浪费，设计了头尾下料口。
- ⊗ Part of bottom mesh in the cage is treated with increased density which can improve comfortability and the natural fertilization rate of chicken effectively.
- ⊗ Two rods are designed for the rest of chicken.
- ⊗ Different heights of water drinking line are set to make the cocks and hens drinking easily.
- ⊗ Reasonable feed supply system can meet the different requirements for cocks and hens.
- ⊗ At the head and tail of the equipment, feed returned machines and dropping feed holes are set to reduce the waste of feed.
